Kuiu Kenai Insulated Synthetic Chetw Review Ireeview Gear Head Field Editor ~ "Randy Johnson High Desert Wild Sheep Guides www.highdesertwildsheepguides.com Altitude Outdoors Pro Staff Basic Description: Kuiu's vision is to create the best lightweight, high quality mountain hunt. clothes. I loved the warmth that the new synthetic down filling has provided me. Great concept. Good luck and continue "Keep your boots" warm for your next adventure on the mountain. Yes, the price of any quality equipment is not cheap. The water repellent Toray 30D STUNNER STUNDER STRED FACE Fabric is 52g/m2. 100% nylon is very comfortable to use and most importantly is extremely quiet. Kenai's jacket compressed into the sack of blue things next to the Superdown jacket at GREEN CAMO, Kenai has played it unprinted for me, although I have found that he is sitting in a cold wind on a high ridge or a rocky spot for long periods of time which is better to wear a light "Wind jacket" over my kenai. With 90 grams of Toray Insulation 3DEFX, the Kenai jacket is warmer than 100 grams of Primaloft. This amounts to an almost perfect solution for strenuous physical activity, while mountain hunting in cold and extreme weather. Another innovative feature of Kenai that I think makes a difference is that the "small wells" under the arms can overflow to provide extra ventilation and remove any heat build-up. Those pockets give me instant access when I need items that I use a lot. When you step out on top of a high glass of glasses for a great game, you don't have the luxury of sitting around a roaring fire. The Kenai features 90 grams of Toray's 3DEFX insulation on the body and upper arms. An independent research study has shown that Toray's 3DEFX 20% warmer than "Primaloft One", due to its loft increase. The less weight you have to carry gives the hunter the flexibility to cover as many countries as possible, the trophy animal of your dreams. I had to wait a long time with KUIU's long-anticipated announcement of this winter of your new Kenai Jacket with Toraya's 3DeFX Insulation! To start the New Year with an explosion! I was not lucky enough to get my hands on one of the new Kenai jackets from KUIU to use in some weather backpack trips from that I had programmed. Keep innovative quality products coming down the tuber! KUIU! As always, thank you for reading my comments to everyone. Awesome, huh? On the forum you can read the comments of mountain hunters everywhere who always have some big questions and thoughts. That is precisely why we are unique individuals with the freedom and ability to make educated decisions. Find that they are very receptive to new ideas. To address this problem I me I asked how KUIU will come out with a lightweight and very smooth sint material that was also compact and quiet? The Toray 3DeFX+ synthetic insulation is extremely breathable, quiet and easy to carry. Wearing the new Kenai KUIU jacket in the Antler Hunting The Facts mount shed: The recent launch of the Kenai jacket by KUIU was exciting news for the mount hunters, as the revolutionary new Toray 3DeFX+ insulation established a new priority for a completely different type of extremely breathable insulation during active effort. Randy Johnson, GUÁ AS DE OVEJAS SALVAJES DEL ALTO DESIERTO Functionality Value Ergonom Durability I have had several backpack trips extra fr this winter where I have worn my Super Down jacket under the Kenai while I have been sitting stationary for hours of glazing and this layering concept has worked very well for me. This aspect is very attractive but the fact that this fabric breathes much more le le noc odaraperp sAtse on is odom Acni e oArf yum each ol azzlarutaN erdaM al euq ne eculart es oStE. ogeuj ed oibmae marg mu se aumt noc arbil ed aAgoloncet us a odibed type of layers/clothing. I think we find that it is a high performance and cutting edge team designed for hunters and enthusiasts of outdoor activities. Toray's 3DeFX+ synthetic insulation is marketed as the first of its kind. They want you to tell them about your experiences with any of their teams, be they good or bad. I appreciated the two chest pockets presented in this jacket. However, as many of you know, KUIU's marketing concept is different in that they bypass retailers to keep the broker out of the process. FEATURES Toray 30D Stunner Stretch Face Fabric 52g/m2. 100% nylon Toray 3DeFX+ Synthetic Insulation Toray KUDOSA DWR Finish YKK Zippers Isolated sint 15.8 oun Keeps heat in extremely breathable Heat conditions High weight ratio Pit-Zips to release heat while moving Dry quickly water-repellent facial fabric Wind-resistant 2-Way Stretch PAT TERNING Anat shaped for fit and comfort Articulated elbows Ornate Athletic Fit POCKET CONFIGURATION Two hand pockets with cremics was YKK Two chest pockets with zipper YKK CONFIGURATION Adjust bell Cinch Kenai Jacket Closure

Works well in weather fr&#o My story: I cannot emphasize enough the importance of light, quality, warm clothing that is made specifically to meet the demands of mountain hunters, backpackers and outdoor enthusiasts. The lack of coating on the light face fabric makes it absolutely silent and perfect for lurking close up for the perfect shot. KUIU is currently taking online orders for this new jacket that will be available this spring. I love that jacket but it keeps the "height" that I appreciate in the plume&#n. The jacket with hood has a price of 199.99 &# dollars &# The hooded kenai as I have at \$ 179.99. For more than a month, I have a field tested this jacket with very harsh mountain conditions in a very cold and miserable weather in a rugged and rugged terrain! I have been extremely pleased with how well this jacket has performed. The new Kenai jacket is designed for tranquility, warmth and breathability. I encourage you to always do your research. Although quiconia performs remarkably well when wet, I still have to face the fact that the jacket will take longer to dry. Simply defined, this means that Kuiu has increased the synthetic filling in specific areas of this jacket where more a hunter or outdoor enthusiast needs it more. Choose to go with the hoodless jacket, as I prefer to wear a header for warmth, such as the guide of Kuiu, Guanie or Merino 145 Beanie. Personally, I have found that if a team item has not performed as expected that Kuiu is willing to make the necessary improvements they will do better in the future. Therefore, they are only sold online directly in a concentrated effort to keep their prices to others, providing the hunters with the best products. Take a serious look at Kuiu's clothing/equipment and accessories they offer. On my Personal List of "RACE PRIORITIES", this specific type of high-performance clothing is worth every penny I've invested! Since my "inner metabolism", it doesn't burn too hot, I get cold quite easily and I don't have the option of backpacking heavy and bulky clothes when I'm hunting the mountain. Each of us is different and we have our likes and dislikes. &# "Pit zippers on Kenai&#e Jacket &# The Kenai jacket is lightweight to pack and for a very cold weather I have no problem with taking my Kuiu Super Down and Kenai jackets with me. Based on the lightweight, the team from Kuiu and Toray have now designed the Kenai 3DEFX + &# insulated synthetic jacket for extreme hunters and easy nuclei facing the challenges of toughest toughest weather conditions and terrain on the planet. When ordering it is very important for the consumer to get the correct size so I suggest that purchasers review KUIU&#s detailed size chart on their website. At only 15.8 ounces the Kenai is only slightly heavier than the KUIU Supertown jacket. I know that I haveng&# been disappointed. I&#ve been wearing KUIU clothing for 4 seasons now and I believe in its use for both cold and hot weather. Another suggestion I have for hunters and outdoor fanatics who want the best in quality gear and like to do their research before purchasing is to access KUIU&#s website at and read their blog and forum links. In instances where I&#ve had to contact KUIU regarding a question or concern the KUIU team has always been extremely customer oriented and have treated me with respect. It should be noted that since the face material is almost noiseless I&#ve had to be careful not to tear it while sneaking through thick brush that can snag and rip the face material. From my years of experience out on the mountain I believe you will be very pleased with the purchase of KUIU&#s new Kenai Jacket. You are not charged for the purchase until the item ships to you. When hiking with the jacket on I&#ve found that I don&#t feel wet and clammy as it vents/breathes very well. It has been designed specifically to create a continuous fiber technology that is loftier and warmer than any other synthetic insulation on the market. Designed as an active insulation garment one of the Kenai jacket&#s strongest features is that it e&#s emphasizes&# strategic body mapping insulation. Please see the following picture of my Kenai jacket in its blue stuff sack next to my KUIU Super Down jacket shown in Verde camo. It is dependable, packable, and very comfortable while worn during periods of high exertion. For hunters in tree stands or for those of you who spend long hours glassing Frias, suckers, crest, would use both jackets. When I buy expensive hunting equipment I hope the best in customer service from any provider if I find that your product has something wrong with it. The armpit panel is full of 60 grams of Toray 3Defx that makes it more common to carry during high effort periods while climbing and hiking is hiking in the mountains. With that, &# constantly investigating and looking for the best in clothes / ultralight hunting equipment and here is where &# Kuiu mountain hunting clothes have become a priority element on my compulsory equipment list and quality. The hunting and outdoor clothing market is very competitive in today's world and healthy competition, in my opinion, is great for you and &# as mountain hunters. To conclude this research, I highly recommend Kuiu&# e &# as a mountain hunting and equipment. &# The Stammer Stretch 30D Facial Fabric does not require cloth coatings like Super Down does so to prevent insulation from moving to the outside. When backpacking hunting is essential that you package in the most light as possible without decreasing efficiency, comfort or safety. &# Always appreciated the fact that Jason Hairston and the whole Kuiu team are not afraid to ask you, your customers, direct comments. &# This factor has made it possible for Kuiu to manufacture a jacket that breathes at a much higher rate, maintaining the most dry, calendum and comfortable user during long rises and extremely active use. What could make better big jacket. &# e&#l &# e&# enjoyed the Athletic Kenai setting but personally I prefer to ask for my shirts and jackets a bigger size than normally use because I do not feel constrained. The Kenai synthetic filling also better than the Down, SuperDown or Primaloft when wet. &# I am enchanted warmth and the of my Kuiu Quixdown Jacket but I have realized that with DRW (durable water repellent) .omsim oy .etnemacis&#f emodn&#t&#treje &# y omsirednes odneicah yotse &# odnauc a&#ratsug em omoc neib nat oripse&#R
